Seminar

“The Great K/T Boundary Debate: How Creativity and Deductive Reasoning Led to a Series of Remarkable Scientific Discoveries”

June 18th, 2019 at 2:15

Polo di Scienze della Terra – aula D

Dr. Mark Anders

George Mason University

Today our journey of scientific discovery will take us from a cm-thick layer of clay near the town of Gubbio to the demise of the dinosaurs, and to the fate of our universe

This activity contributes to the acquisition of credits for LM74 students
